

# OPTIFACTS SOFTWARE™

# NR7

The screenshot displays the Optifacts NR7 software interface, which is a comprehensive lens management system. It features several overlapping windows:

- Lens Orders:** A window for managing orders, including fields for 'Bill To Account', 'Ship to Account', 'Commercial Code', 'Manufacturer' (set to 'ES Esak'), 'Lens Style' (set to 'SVST'), 'Seg Size', 'Type Code', 'Material', and 'Color'. It includes a search function and a list of available lenses.
- Contacts:** A window for managing contact information, with fields for 'Style', 'Type', 'Material', and 'Color'. It also includes a 'Show and Expand Sku' checkbox and 'MFR Files and Priority' settings.
- Lens List:** A table displaying a list of lenses with columns for 'MFR', 'Style', 'Type', 'Material', 'Color', 'Diam', 'Base', 'True Base', and 'Lower Add'. The table shows various lens configurations and their associated values.
- Blank Select:** A table for selecting blank lenses, with columns for 'Style', 'Type', 'Material', 'Color', 'Base', 'Seg Size', 'Lower Add Floor', 'Lower Add Ceiling', and multiple 'MFR' columns (MFR 1 through MFR 5).

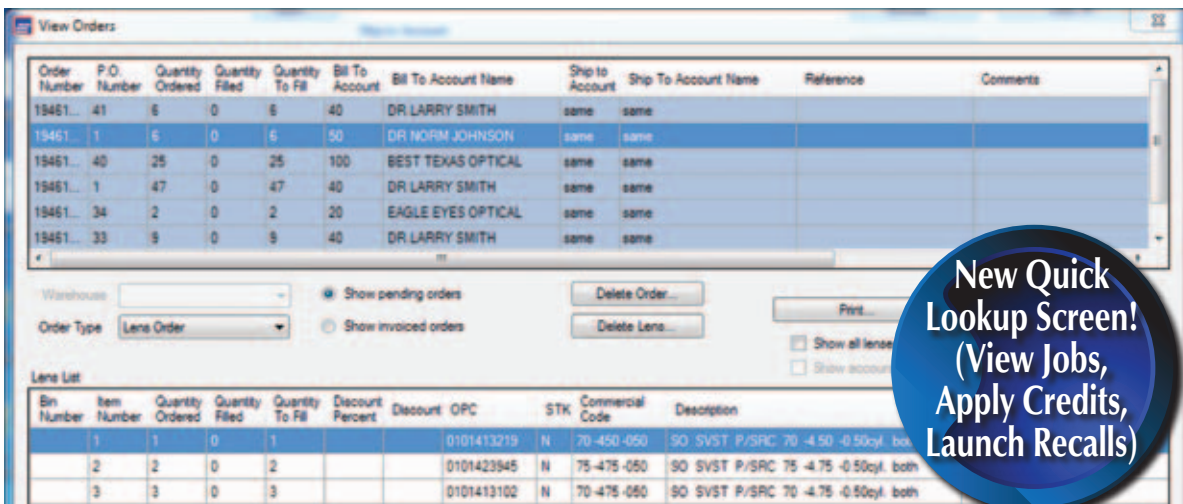

At the bottom of the interface, there are status messages: 'Found 275 lens records', 'Found 19 existing blank selection settings', and 'Found 275 lens records'. The version number 'Version 1.0.5' is also visible.

PACKED WITH POWERFUL NEW LAB  
MANAGEMENT FUNCTIONALITY

COMPLETELY RETOOLED  
FOR LINUX OS ENVIRONMENT

## New LMS Version for Linux Environment

- New Quick Lookup Screen (View Jobs, Apply Credits, Launch Recalls)
- New Bulk Stock Order Entry Screen (Handles Back Orders!)
- New Commercial Product Selector (“drill-down” menu to select lens, material, and color in one key stroke!)
- New Job Flow Management Tool (control how jobs flow through production process and ship with 100% accuracy)
- New Frame and Parts Inventory Control
- New Estimated Delivery Date Calculator
- New Frame Shape Library (Common shapes to start processing the job with accurate thickness before frame arrives)
- Email Alerts (send automatic messages to remind customers of job status holds such as “we’re still waiting for your frame”)
- New Commercial Branding Editor (capture special measurements to process new digital designs)
- New Job Station Alerts (display a message on job stations to alert operators of special instruction, or to stop the job)
- New Frame to Come Management (track frames in numbered bins with auto-assign tray numbers and trace linking, before or after the job comes in)
- New Consolidated Stock Pick Ticket (fill multiple orders of finished lens Rx jobs easily by scanning opc at mail-out and produce the invoice!)
- New Marketing Campaign tools ( “buy 5 get 1 free”, etc.)
- Enhanced Job Feasibility Screen (View blank selection results, quantity on hand, price of order, estimated delivery date, and user edit options before you print)

**New Quick Lookup Screen!  
(View Jobs, Apply Credits, Launch Recalls)**
